# MODEL 680S

## Automatic Front & Back Labeling System

The Auto Labe Model 680S label system is our premier system for labeling the front and back of oval products and other elliptical and conical shaped bottles. The Model 680S is designed for the most demanding production lines and is capable of moderate to high speed labeling. The system features include, product metering, dual product alignment belt assembly with on center adjustment from either side of conveyor. The systems electronic features include a color touch screen, component speed following and memory settings for quick recall of pre-sets. The Model 680S has the latest in technical advances with PLC control, stepper drive applicators and encoding speed monitoring. The system can be seamlessly integrated with zero down time applicators.
